Customer Reviews

The book information is great. I'm finding the information very helpful as I've been learning about global health. The binding is cheap the book is falling apart after a week. Recommend the book but need new publisher who will bind it better. A \$70 book should last longer than a week.

This book is boring. I like to learn about Global Nursing, but inside, the information is all compacted, the font is super small which makes the reader squint while reading. It's all typed information with only about 3-4 pictures only in a book that has 614 pages. or the Author needs to get in touch with the publishing company and tell them to use more adhesive glue on the inside of the binder to make the pages stay together. Two of my classmates have the same issue. The pages rip 3/4 way down automatically when you open the book. I would not recommend this book to read if you want to keep your eyeballs in your sockets !!! (PRINT IS TOO SMALL) !!!!!

I like the book because it is organized and the book gives vital information that is needed for the

subject without overwhelming the reader.

Purchased as textbook for a class. Difficult to follow, disorganized, repetitive, as well as leaving gaps

The content is great - but the font size is ridiculously small - hard to read, highlight and take notes.

The binding of the book is falling apart and pages are falling out of the book as I'm trying to use it

The book is easy to read and very informative! I like the case studies at the end of each chapter.

for the price, the book is more tattered than I would expect
