Egypt's Prehistoric Fauna: An AUC Press Nature Foldout (AUC Press Nature Foldouts)

Synopsis

At the World Heritage site of Wadi al-Hitan, or the Valley of the Whales, in Egypt's Western Desert, an ecotour in the desert reveals a site of invaluable prehistoric fossils, from whales and rays to sea turtles and crocodiles. Forty million years ago, this region in Egypt was submerged under the ocean, with a coastline of mangrove swamps. Yet while this site reveals incredible steps in the evolution of some species, it also proves the extraordinary perfection of others: crocodiles, sea turtles, and even bats have changed very little over the course of millions of years! Today, their descendants can still be found in Egypt, struggling to survive a much greater challenge than they faced with the dinosaurs: people. Water-resistant and compact, filled with colorful illustrations and photographs, comprehensive text, diagrams, and maps, this foldout guide is the perfect travel companion through geological time. Includes:- Chart of prehistoric animals and their Egyptian contemporaries, including whales, crocodiles, dugongs, sea turtles, fruit bats, and lizards. - Map of Egypt today with contrasting image of the continent 40 million years ago. About the series: The AUC Press Nature Foldout series combine, in beautifully practical form, a wealth of information written by leading experts with striking full-color illustrations on the flora and fauna of Egypt and the Middle East. Designed for nature lovers and outdoor adventurers, as well as for indoor use, the foldouts come in an easily foldable format, at once compact, waterproof, and portable, making them durable and convenient travel guides. Size is 23 x 8.5 in. / 58.5 x 21.5 cm unfolded.

Book Information

Series: AUC Press Nature Foldouts

Pamphlet: 8 pages

Customer Reviews

Did you know Egypt had a Valley the Whales as well as a Valley of the Kings? I am mesmerized by this handy nature fold out with its beautiful illustrations. It is packed full of easy to comprehend facts, delivered in an interesting format. There are maps, timelines and notes regarding the history of digs and the significance of the finds. I discovered that the Nile crocodile is a living reminder of a prehistoric creature. These guides are waterproof and very sturdy so they can be carried easily and used time and again. You can even fold them so they stand up on their own in a bookshelf. The Egyptian series would make great gifts for someone planning to study or travel to Egypt.

I love this little piece of art, keep it on the kitchen counter. Informative and well printed, has a coating that makes it durable. The drawings are quite realistic as well as beautiful. Glad I bought it.

This is not only informative but is a beautifully drawn piece of Artwork. Egypt's prehistoric past is something that I have never researched or imagined. This opens up a whole new world of what was there millions of years before man ever entered the scene. I highly recommend it. I give it 5 stars. I plan on buying the entire Dominique Navarro collection. Wonderful.

8 yrs old boy love the book
